

FOR LAW FIRMS · STABLECOIN FEE COLLECTION

Your clients want to pay in stablecoins. Your firm gets paid in pounds or euros.

A growing number of clients hold their wealth in USDT and USDC, the two most widely used digital dollars. Sentvia lets them settle your fees that way, while your firm receives GBP or EUR into a dedicated account in its own name.

• Client pays in USDT or USDC

• Firm receives GBP or EUR

• Know Your Transaction (KYT) screening

• Same-day settlement

Why clients are asking

1 GLOBAL

International clients

Clients abroad can pay in minutes, any day of the week, without slow and costly international wires.

2 WEALTH

Wealth held digitally

Founders, investors and family offices often hold digital dollars and prefer to pay from those funds directly.

3 SPEED

Speed on urgent matters

When a retainer is needed before work can start, a stablecoin payment clears the same day.

How it works

1 You invoice as normal

Bill in GBP or EUR, showing the USDT or USDC equivalent and your firm's dedicated wallet address.

2 Your client pays in USDT or USDC

We verify and screen the transaction and run KYT checks before any funds are accepted.

3 We convert at the agreed rate

The rate is locked in advance, so the invoice value you expect is the value you receive.

4 Your firm is paid the same day

GBP or EUR is paid out in your firm's name. Your firm never holds or handles digital assets.

From your client's stablecoins to your firm's account

Your client pays in USDT or USDC. Sentvia screens and converts the payment, then pays GBP or EUR into a dedicated account in your firm's name.

Illustrative example only. Payouts are also available in EUR.

Built for the standards law firms keep

- 

Every payer verified

Clients complete identity verification and regulatory checks before funds are accepted.

Approval controls

Decide who can view, approve and release payments, with a full record of activity.
- 

Strong security

Biometric checks at account opening, two-factor sign-in and real-time monitoring.

A named contact

A dedicated set-up officer guides your firm from first call to first payment.

Questions firms ask us

Does our firm hold crypto?	No. Your firm only ever receives GBP or EUR.
Whose name is on the account?	Your firm's. Payouts are made in your firm's name.
What rate do we receive?	A rate agreed before your client pays, so the invoice value is protected.
How fast are we paid?	Same day.
What about our compliance team?	We provide payer verification and full records. Your COLP and COFA can review the set-up against your AML policy and the SRA Accounts Rules.

Offer your clients a new way to pay.

Book a short call and we will walk your finance and compliance teams through set-up.
