

2026 Stablecoin Payment Platform of the Year · Pan Finance

Stablecoin Payment Platform For Global Businesses

Send, receive and settle global payments using stablecoins,
with named IBANs, spot-rate FX and same-day settlement.

www.sentvia.com

THE PROBLEM

Cross-border payments are **broken**

Payment delayed

This transaction is temporarily under compliance review. You will be notified if further action is required.

[Contact support](#)

1 High-value transfers blocked

Large cross-border payments are frequently delayed or frozen.

2 Multi-day settlement delays

International transfers still rely on slow, intermediary banking chains.

3 No stablecoin acceptance bridge

Businesses lack a compliant infrastructure to safely accept USDT.

4 High rejection rates

International payments face high rejection rates due to compliance.

THE MARKET SHIFT

Market infrastructure trends

Stablecoin transaction volume

2020 – 2025 · TRILLIONS IN USD

Stablecoin transaction volume has grown from **\$1T to over \$33T** in five years, signalling a structural shift in global settlement infrastructure.

Mission-critical compliance

Compliant infrastructure is mission-critical as high-value transactions move to stablecoin rails.

Multi-currency expectations

Modern clients expect seamless multi-currency flexibility across fiat and stablecoins.

Asset-backed adoption

Real estate and luxury asset transactions are increasingly requesting stablecoin settlement.

Institutional acceleration

Institutional adoption is accelerating across global financial markets and asset classes.

What is Sentvia?

Sentvia is a regulated global payments platform that bridges stablecoins and traditional banking, enabling businesses to accept digital assets and settle instantly in fiat.

BUILT ON THREE CORE PILLARS

Accept stablecoins

Enable clients to pay in leading stablecoins through a secure, regulated infrastructure designed for seamless onboarding and execution.

Convert instantly to fiat

Convert stablecoin payments in real time at transparent, pre-agreed rates to ensure value certainty and efficient settlement.

IBANs

Named IBAN accounts

Operate through dedicated, regulated IBAN accounts supporting compliant fiat and stablecoin payment flows across borders.

CORE PRODUCTS

Integrated payments infrastructure

Payments

- Stablecoin acceptance
- Fiat currency settlement

FX & liquidity

- Instant stablecoin and fiat conversion
- Dedicated OTC execution

OTC

- Large volume execution

Platform

- Unified dashboard
- Treasury management tools

B2B & C2B

- First and third party flows

Banking

- Named IBAN accounts
- Multi-currency support (\$, €, £, AED)

PAYMENTS

Fiat and stablecoin payment flows

Funds move in either direction through one settlement layer: fiat in, stablecoin out, or stablecoin in, fiat out.

NAMED IBANS

Business-dedicated IBAN structure

A **virtual IBAN** is a unique bank account number assigned to a client that routes funds into a main master account.

FIRST & THIRD PARTY FLOWS

Flexible settlement for internal and external payments

PRIME OTC SERVICE

Premium desk-level execution

1 On ramp

2 Off ramp

PLATFORM

Stablecoin & fiat infrastructure

Unified accounts

Unified stablecoin and fiat account management.

IBANs

Named IBANs

Named IBANs with secure settlement controls.

Instant FX

Instant currency exchange with locked execution.

Cross-border payments

Cross-border payments across major currencies.

Trading & treasury flows

Move liquidity efficiently between stablecoins and fiat with monitoring, controls and reliable settlement.

WHY CLIENTS CHOOSE SENTVIA

Built for business

One regulated platform for stablecoin and fiat, with the controls institutional flows expect.

Regulated infrastructure

Built on a compliant framework designed to support secure stablecoin and fiat payment flows across jurisdictions.

Near-instant settlement

Execute conversions and settlements in real time, reducing delays and improving liquidity efficiency.

Stablecoin + fiat in one platform

Manage digital assets and traditional banking rails seamlessly within a single, unified infrastructure.

Dedicated OTC & support

Access tailored liquidity execution and hands-on support for high-value or structured transactions.

High transaction acceptance

Designed to reduce rejection risk and support reliable cross-border payment execution.

COMPLIANCE & TRUST

Regulated. Secure. Transparent.

Safeguarding procedures

Client funds are segregated and protected through structured safeguarding and operational controls.

Risk monitoring systems

Real-time transaction monitoring, reporting and oversight to detect and mitigate financial risk.

Licensed / MSB status

Operating under regulated frameworks to ensure legal clarity and institutional compliance across jurisdictions.

KYC / AML framework

Robust identity verification and anti-money laundering controls aligned with global regulatory standards.

Banking & liquidity partners

Integrated with established banking and liquidity providers to support secure settlement and fund movement.

Traditional banking vs Sentvia

Traditional banking		Sentvia
2–5 day settlement	↔	Near instant
High rejection rates	↔	High acceptance
Fiat only	↔	Stablecoin + fiat
Restricted cross-border	↔	Borderless
Limited transparency	↔	Real-time dashboard

CLIENT JOURNEY

Simple onboarding. Fast **deployment**.

Onboarding

Quick digital verification and compliance checks to activate your account securely.

Wallet issued

A dedicated wallet is created, enabling multi-currency and stablecoin capabilities.

Go live

Start sending, receiving and settling payments instantly across global rails.

Ongoing support
